

Hortonworks

Setup Guide for HDP Developer: Apache Pig and Hive

Revision 5
Hortonworks University

System Requirements

The following is the recommended minimal system requirements:

- Reasonably powerful **x86/amd64 hardware**. Intel Core2 Duo or AMD Athlon Dual-Core or equivalent or above.
- RAM: At least **2GB**
- Free disk space: **2GB**
- Network connection (either a LAN, or Internet link: broadband, cable, DSL, etc.)
- The following ports need to be open for OUTBOUND access from the student machines to Amazon Web Services:
 - 22
 - 80
 - 8080
 - 4000
- You must install **NoMachine client** on your computer to connect to AWS-based lab environment: <https://www.nomachine.com/download>

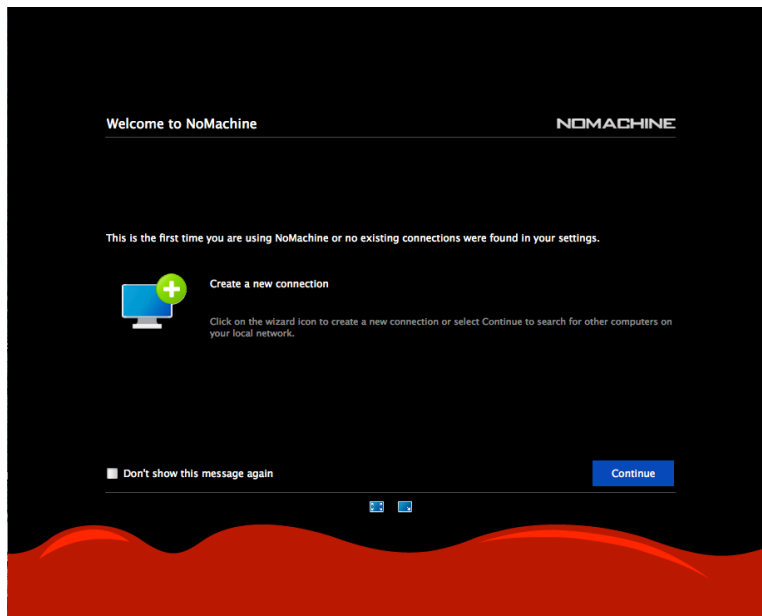

IMPORTANT: If you have any issues or questions, please send an email to training-support@hortonworks.com.

Connect to AWS VM using NoMachine client

Objective:	To connect and test AWS lab VM using NoMachine Remote Desktop client.
Before You Begin:	<ul style="list-style-type: none">• You need to execute these steps during the class.• Make sure your hardware meets the requirements listed above.• NoMachine client is already available on the computer.• The instructor has already provided an IP address for the AWS VM.

Step 1: Connect to AWS VM using NoMachine client

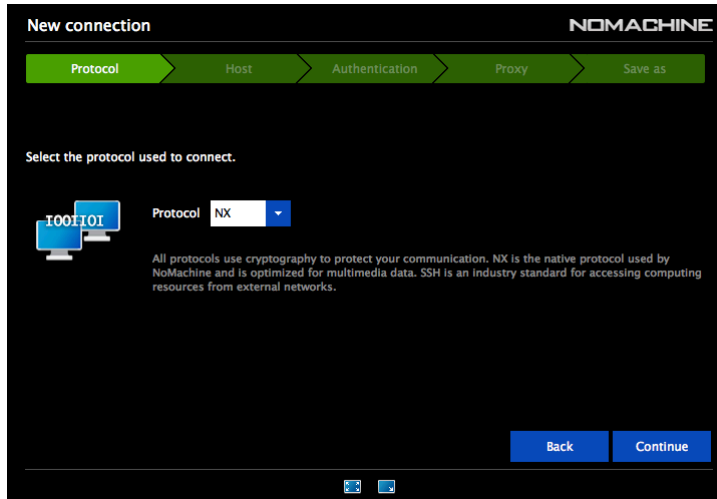

1.1. Start NoMachine client and click on 'Continue':

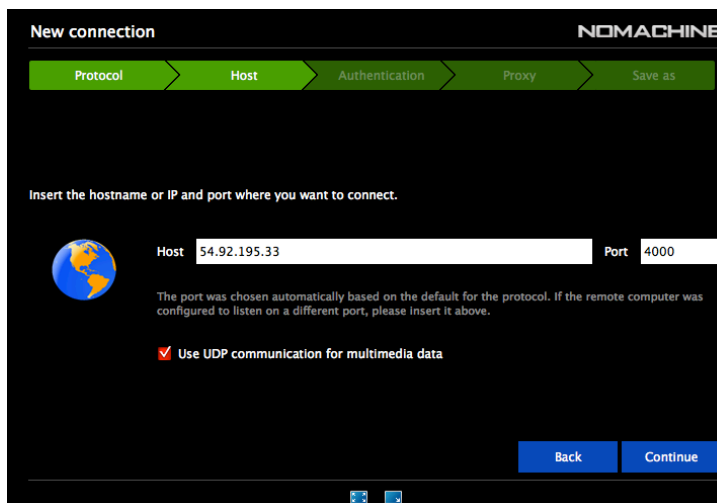

1.2. Click on 'New':

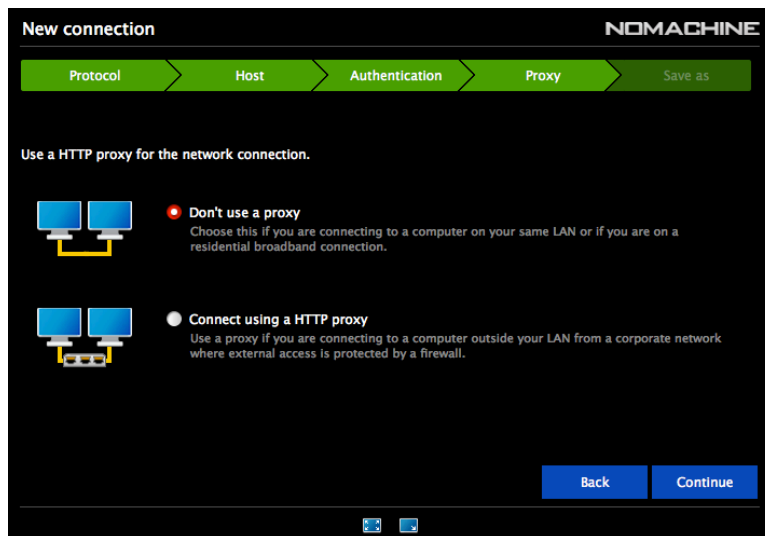

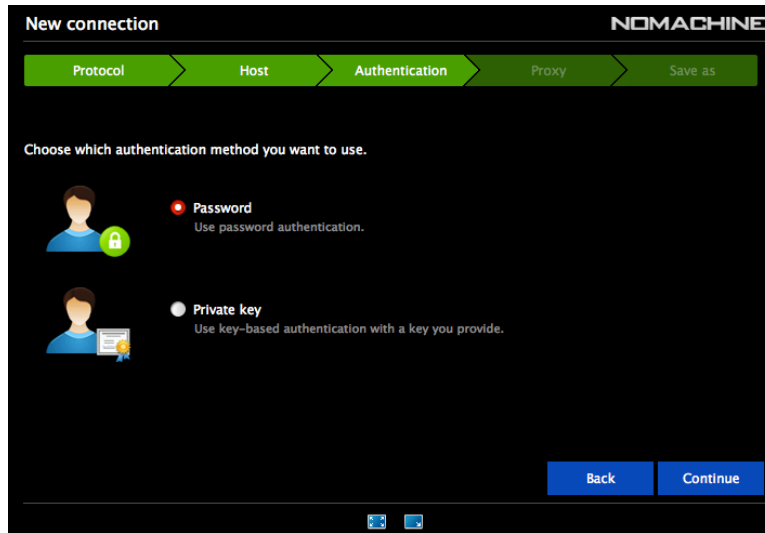

1.3. Make sure selected 'Protocol' is 'NX' and click on 'Continue':

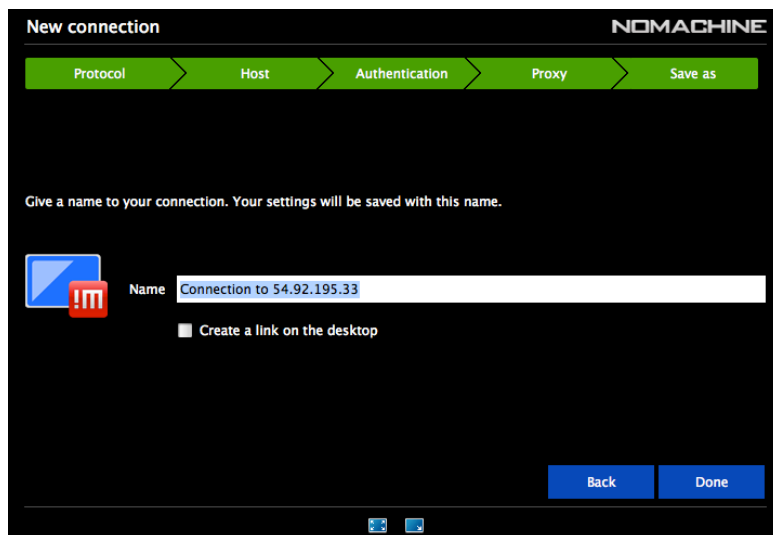

1.4. Enter the IP Address provided by your instructor in 'Host' text-field and make sure value for Port is '4000'. Click on 'Continue':

1.5. Now select all default settings and keep clicking on 'Continue':

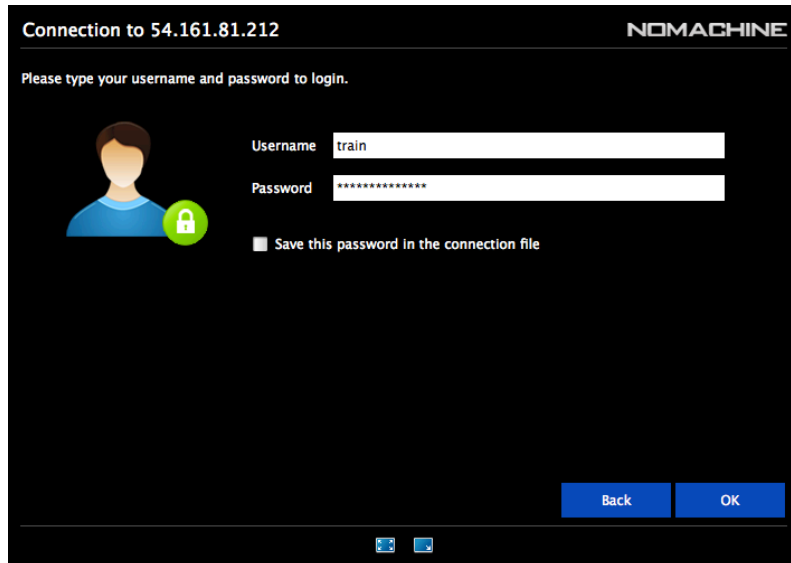

1.6. Click on 'Done', once you see below screen:

1.7. Select the newly created connection and Click on 'Connect':

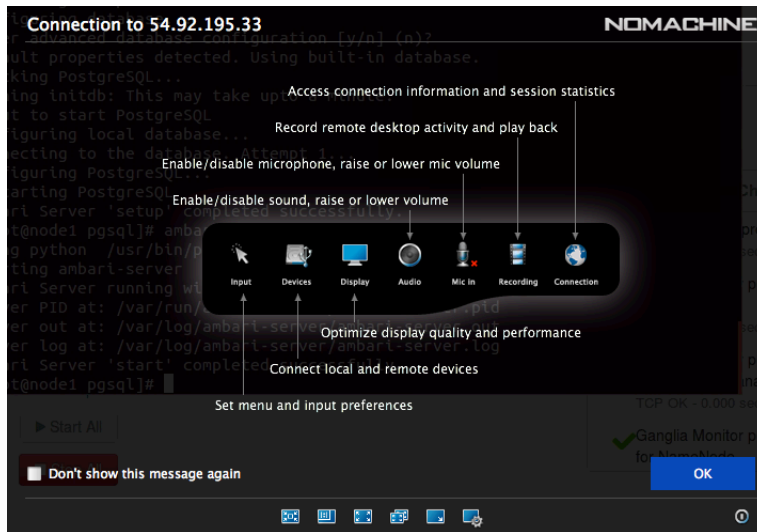

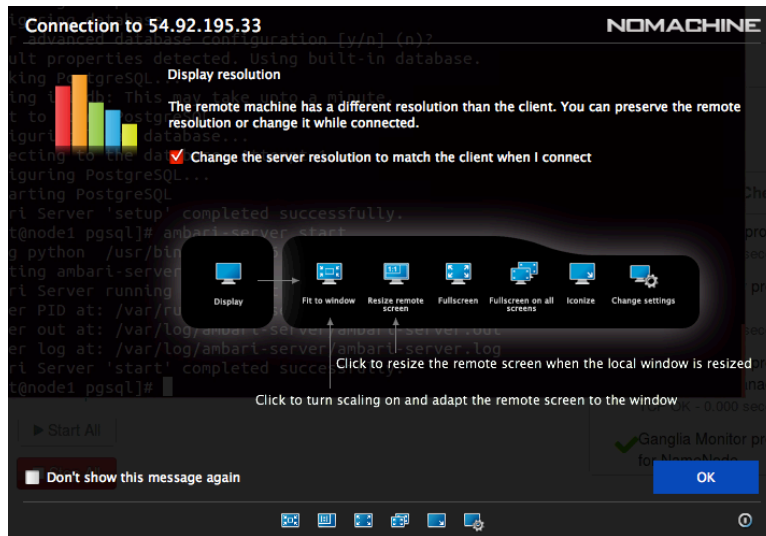

1.8. Enter Username (train) and Password (It will be provided by the instructor). Click on 'OK':

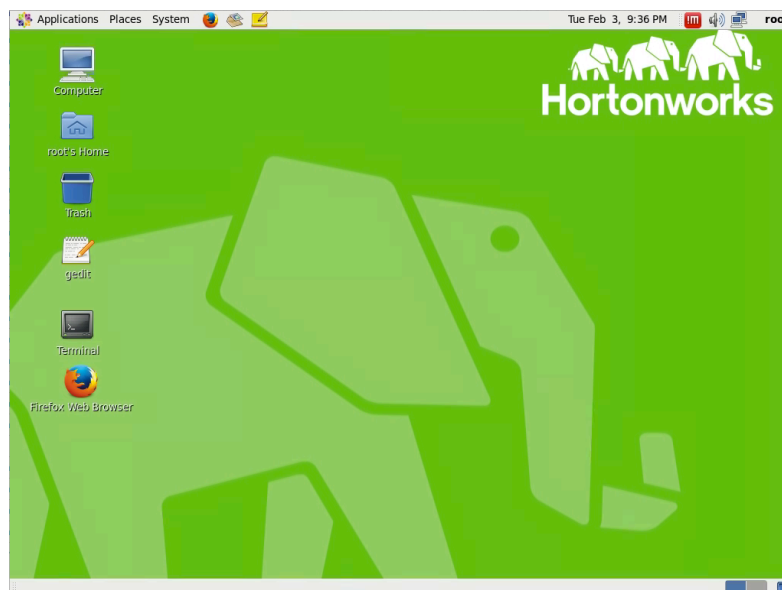

1.9. From this point, keep clicking on 'OK' to retain default settings until you see a login screen:

1.10. Now, you will be connected to AWS VM and you should see the following:

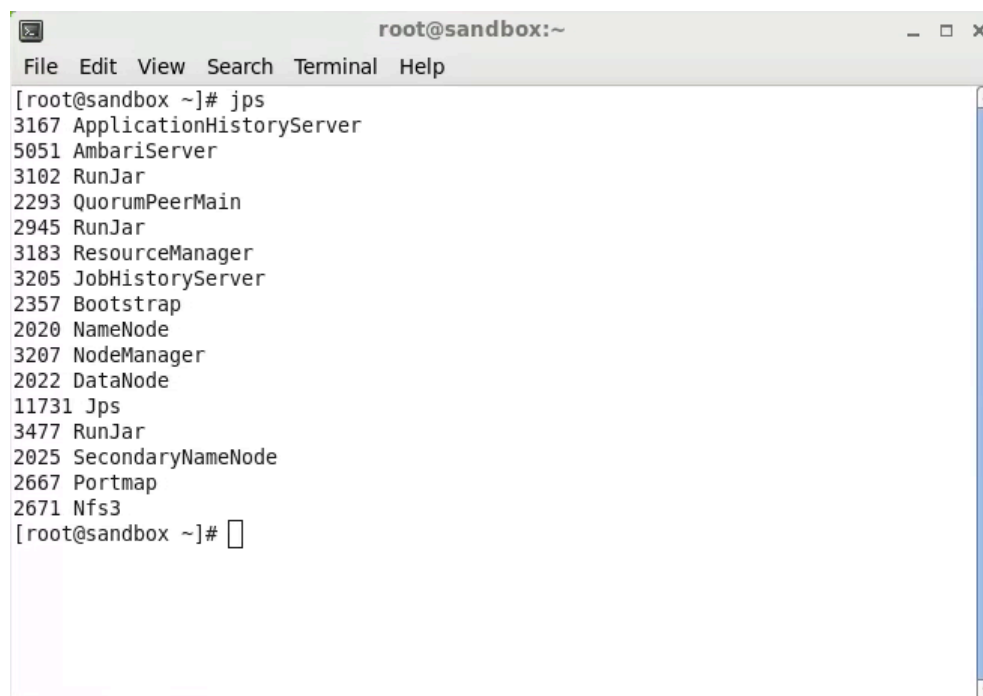

1.11. Double click on Terminal icon:

1.12. Wait for few minutes and enter following commands to verify all the components of the cluster are running:

```
# jps
```

You should see a list of hadoop daemons running on this VM:

RESULT: You should be connected to the classroom VM running on AWS.

IMPORTANT: If any of these steps failed, or if you have any issues or questions, please contact to your instructor OR send an email to training-support@hortonworks.com.
